DETAILED ACTION

Allowable Subject Matter

Claims 1-19, 21 and 22 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art either singly or in combination fails to disclose an optical encoder having an optical wavefront dividing element being operative to divide the incident beam into a first and second beam that are incident on the first and second tracks of the encoder respectively, and an encoder scale including a first and second track regarding claim (15), claim (16), and claim (22) including all the limitations of claim (15) and (claim 16) along with the optical wavefront dividing element having a periodic grating pattern with a period (P) satisfying the following relationship: $\tan(\lambda/P) = Y+d/2(2D-Z)$ where λ is the wavelength of the light source, (Y) is a height of a largest one of the optical detectors, (d) is a separation between the optical detectors, (D) is a separation between the planar substrate and the encoder scale, and (Z) is a separation between the planar substrate and the wavefront element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
